

Dear Graham

Just to let you know, the new lighting system which CES installed for us as part of the major refurbishment programme for St. Oswald's, was blessed by the Archdeacon of Croydon this morning. It was a lovely Service, much enhanced by our ability to match lighting levels to suit different aspects of the worship. Everyone was very impressed and said how much the presentation and atmosphere of the Services had been improved, as well as making our Church look more beautiful than they could ever remember it (and some go back almost 50 years!). We are now looking forward to the Christingle, Carol and Christmas Services which will be held in the evenings when the full impact of our new lights can be assessed.

On a personal note I just wanted to thank you and your colleagues for your extremely helpful ideas and suggestions for the new lights; for designing a system that complemented the age and style of the building, and (by general agreement) has improved the building immeasurably, and also for the very professional way the installation was completed. In particular your colleagues were always helpful in working round the day to day activities within the Church and in enabling us to maintain our regular Sunday Services.

We would not hesitate to recommend you to others and would always welcome anyone to our Church who wished to see what had been achieved.

Regards. [REDACTED] Church Warden
